22 x bet

<p>The TL;DR version of this review is: surprising light, extremely pocket able, does the job, not my dream charger but at the price it s well worth it.&It ;/p>

<p>We ve covered a product of Lepow s before, the Moonstone. Like the Moon stone, the Poki comes with a cloth carrying case that you can stash a USB cable in (it appears to come with a 6 ‡ USB-> MicroUSB,) or chuck your ID and credit card in and use it as a wallet while you re out. It s actually the first thing that stood out when I was looking at the device. The Moonstone is still going st rong with a friend of mine a year later.</p>

<p>The battery delivers a 90% conversion efficiency rating according to sp ecs on the manufacturer s website. Most batteries go from the high 70 s to mid 8 s. You want to see a higher number as this is how much power gets delivered wi

th the rest being lost in conversion.</p>

<p>The Poki can charge and recharge at 2.1amps. This means you re not stuc k for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you should be able to charge this in under five hours and with 90% conversion efficiency you s hould have around 9000mAh of actual juice to spare. That should be enough for at least three complete charges from dead to full for any smartphone on the market today.</p>

<p>2.1 amp charging also means you re not going to spend ~7 hours charging a 3000mA phone from dead, more like an hour and a half if your phone supports i t.charging that fast.</p>
