How likely is it to see a shooting star? The chance of seeing at least one shooting star in a given hour between midnight and sunrise is 84 percent.

Shooting Star Meaning, Spirituality and Superstitions

science.howstuffworks : 10-superstitions-about-stars

Shooting stars are actually what astronomers call meteors. Most meteors burn up in the atmosphere before they reach the ground. However, once in a while a meteor is large enough that some of it survives and reaches Earth's surface. Then it is called a meteorite.
