

semifinal sul americana 2024

Minecraft was first released to the public on 17 May 2009. Today it is published in the exact state of its initial release. This means that there are only 32 blocks that you can build with, and all the original bugs are in there! So if you are used to the latest version, it can be quite a shock to see how the game has evolved. To quote Tom Stone from Mojang "With just 32 blocks to build with, all the original bugs, and an (inter)face only a mother could love, Minecraft 2009 is even more glorious than we remembered!"

The Classic version was the first development stage that had some of its versions released to the public. It was initially named "Minecraft Alpha". So it is the version before all the updates and expansions.

Social channels

This game has become even more popular due to well-known YouTubers such as PewDiePie and Lazarbeam creating Minecraft classic content. These videos draw millions of views and help players learn about the game.

Why not jump into creative mode and give this classic a try?
