The Nvidia GTX 1050 Ti is a

mid-range

graphics card that was released in 2024. In 2024, it still offers de

cent performance for 1080p gaming and can handle many modern games at medium to

high settings. However, for more demanding games and higher resolutions, it may

struggle to maintain smooth frame rates.

How good is the Nvidia GTX 1050 TI in 2024?

Honestly, this GPU is impressive. It still runs so

me of the latest titles such a spiderman games, God of War, Mortal Kombat 1, War

zone and Call of duty, at 40-50fps medium to lowish settings. for a gpu almost 8

years old, honestly

its still very well playable
