Slot machines use a random number generator (RNG) algorithm to determine the outcome of each spin. This algorithm generates a sequence of numbers that correspond to the symbols on the reels.

What algorithm do slot machines use? - Quora

What algorithm do slot machines use

Odds and probability are both used to express the likelihood of an event occurring in the context of gambling. Probability is expressed as a percentage chance, while odds can be presented in a few different formats, such as a decimal, fraction, or moneyline.
