It's clear, for example, that finding a square numbered 8 means that all eight adjacent squares contain mines.

If the square harbors a mine, the player loses. If instead a number (f) is revealed, the player must click on the board every square that doesn't have a mine under it.

Once you've done so, the game will be over. If you accidentally click a square that has a mine beneath it, the game will be over. You'll have the option of starting a new game or redoing the one you just played.

To win a round of Minesweeper, you must click on the board every square that doesn't have a mine under it. Once you've done so, the game will be over. If you accidentally click a square that has a mine beneath it, the game will be over. You'll have the option of starting a new game or redoing the one you just played.
