From Flash to HTML5 available without Poki games

Since people have always enjoyed unwinding and having fun, they have created numerous devices or simply exploited resources that were available to them. That is how things familiar to us were created: balls, skittles before that they were just stones and sticks. But now we have all these technology and devices, thanks to which the gaming component of everyday life has increased many times.

Since modern browsers have stopped supporting Flash technology since 2024, games based on this system are gradually leaving web pages.
