of a limit of a function at a point, you can use the following conditions:&lt;/s

v&gt;&lt;div&gt;How do you know a limit does not exist? In short, the limit does

not exist &lt;span&gt;if there is a lack of continuity in the neighbourhood abo

ut the value of interest&lt;/span&gt;. Recall that there doesn&#39;t need to be

continuity at the value of interest, just the neighbourhood is required.&lt;/div
