2024... finance.yahoo :

Software-generated random numbers only are pseudorandom. They are not truly random because the computer uses an algorithm based on a distribution, and are not secure because they rely on

deterministic, predictable algorithms.

True Random vs. Pseudorandom Number Generation - wolfSSL

But good random number

generators don't have any clear pattern to their output, making

is no limit to the size of the codebook that algorithmic random number generation

can support.
