[A chance dupla x2](#) is a term that means a double chance opportunity in a game of chance. In this case, the game, for example, has a duplicated X2, meaning that the player has 2 chances to play or win. If the player places R\$ 1000 in a double chance game, they can win R\$ 2000. To calculate the double chance probability, you divide the simple chance by 2. For example, if the simple chance is 1/100, the double chance probability is 1/200.
