I just bought this, as I was looking for a game that is exactly this premise. Alas, when I found this game, I bought it and I was extremely disappointed. Just loading up the game took forever, and I kept having to close and reopen it. When it finally opened, it took 17 minutes just to do that. Yeah. Now it's not like I have a terrible laptop, my laptop is really good and I've never had any issues with such a thing.

Then, upon opening the game, I couldn't look around because the default settings were set to ultra. For the record, I don't really have an issue with game devs doing this, but it leaves a bitter taste in your mouth. I had to set the quality to very low and even then it was still so laggy. It was 2 fps at the most (like, not stretching the truth) Tj T* BT /F

ite literally just pixels. The game was also very repetitive, so even if you have a NASA super-computer you will get bored of this really quickly. I

do not suggest this to anyone, no matter how enticing it looks. It was terrible and so incredibly frustrating, especially because I kept having to me

ddle with the settings and make the game actually playable (spoiler a) Tj T* BT
